DEVELOPMENT CONSULTING '16
STRATEGIC PLANNING CONSULTING '17
Down Syndrome Partnership of North Texas

Using research, stakeholder interviews, and our “Infrastructure for Fundraising and Community Engagement Success” assessment tool which evaluates seven critical components, Project Partners devised recommendations to address the board’s desire to increase fundraising success, complete with visuals and templates. When the assessment identified the need for strategic planning for the organization, Project Partners remained on assignment to facilitate that process and meld the assessment results. We helped build board consensus on the defined mission and the program of work to achieve that mission, then helped a very dedicated board populate a strategic plan that included objectives, action steps, responsibilities, and timeframes in five key focus areas. In addition, we crafted a case for support for use in communications, community engagement, and fundraising.

“Thank you for all your hard work on DSPNT’s development assessment and strategic planning. What a difference both efforts have made! I truly enjoyed working with Project Partners and welcome the opportunity to work together in the future.”

Elizabeth Hammond, Managing Director
Down Syndrome Partnership of North Texas
